

I don't understand why the FCC would want to implement a proposal that would lessen Indiana's Telephone Privacy law protections. They have been a god send! I have been able to sleep in on weekends, eat my dinner without interuptions, and spend time with my family and friends! I have found this to be one of the major perks of living in Indiana. I used to receive 5 to 6 calls a day, but now I get 1 a week. It's about time that there are LAWS that prevent me from being harrassed in my own home. I don't know why you would want to open a door that has already been shut. If you want to pass laws for states without telephone privacy laws that is fine- just don't let your wimpy law override ours!
